PREFACE

A LIBRARY existed at St. Bartholomew's Hospital in the time of John Wakeryng, otherwise Blakberd, who was elected Master in 1422, and presided over the Hospital till November 16, 1466. Stow mentions that "Sir John Wakeryng, Priest, Master of this House, in the yeere 1463, amongst other bookes, gave to their common library the fairest Bible that I have seene, written in large vellum by a brother of that house, named John Coke, at the age of 68 yeeres, when hee had beene Priest 43 yeeres. Since the spoil of that Library, I have seene this Booke in the custody of my Worshipfull friend, Master Walter Cope." Only two books of this Library are known to be in existence. Both are in the British Museum Library. One (Additional 10,392) is a volume of selections from the writings of St. Augustine, St. Bernard, and other theologians in the hand-writing of the John Cok or Coke mentioned by Stow. On the reverse of the first leaf is written, "*Ista sunt contenta in libello isto scripta a fratre Johanne Cok, anno domini 1432.*" The other is a magnificent book of the Decretals of Pope Gregory IX., "*Decretalium Libri V. cum glossa*" (Old Royal 10.E4), with interesting illuminations on its margins representing fables, and a great variety of incidents of life of the time. On the first page is the inscription "*Liber domus Sancti Bartholomei in Smythfylde.*" Domus is the term regularly applied to the Hospital, while ecclesia or prioratus is used for the Priory of Augustinian Canons in Smithfield, now represented by the Church of St. Bartholomew the Great. This splendid

volume had found its way into the possession of Lord Lumley, and was bought from him by King James I. for the library which that learned monarch formed for his son Henry Prince of Wales. The next notice of a Library is in 1667, the year after the Fire of London, when a Library was formed "for the use of the Governors and young University scholars." No volume of this Library is now known. In 1793 the Medical and Philosophical Society, which afterwards became the Abernethian Society, had a Library which was ultimately transferred to the Hospital Library, and which forms the basis of the existing collection. "A Catalogue of the Library of the Medical and Philosophical Society of St. Bartholomew's Hospital" was printed in December, 1826, and there is a copy in the present library. In 1865 was printed "a Catalogue of the Library of St. Bartholomew's Hospital," which has for some time been out of print. The present Catalogue was made by Mr. Joseph Manning, Attendant in the Library of the Royal College of Physicians. The Medical Officers and Lecturers defrayed the cost of preparing the manuscript, and the Governors of the Hospital that of printing the Catalogue.

Honorary Secretary of the Library Committee.
